

SO-3 Electric aspirator

for medical procedures

SO-3 is an aspirator designed to suction secretions and fluids in patients treated in dental and surgical wards, emergency departments (ED), hospices.

The aspirator SO-3 is a device of small size and powerful at the same time. An efficient vacuum pump allows for comfortable operation during treatments. Due to the small dimensions, the aspirator is handy to use during treatments and its convenient handle allows for easy portability.

- stepless adjustment of the maximum vacuum
- clear indication of the current value of the vacuum
- convenient carrying handle
- quiet and continuous operation
- foot switch
- reusable containers 1l or 2l
- disposable cartridges 1l or 2l

The aspirator SO-3 is designed for mounting on the aesthetic, stable trolley. Placing the aspirator on the trolley increases its functionality. The trolley can be equipped with an instrumental rail, to which you can attach additional accessories.

Catalogue number	SO-03-30
Name	SO-3 Pasat
Max air-flow	30 l/min
Max vacuum level	do 85kPa (+0%/-10%)
Vacuum adjustment range	(0÷85)kPa
Capacity of the collecting containers	2l
Type of applied parts	CF
Isolation class	II
Power consumption	70VA
Power supply	230V/50Hz
Dimensions	160x400x300mm
Weight	5kg
